Plant Cell, Tissue and Organ Culture **31:** 265–266, 1992

CONTENTS Volume 31 1992

Volume 31 No. 1

Orlikowska, T.: Effect of *in vitro* storage at 4°C on survival and proliferation of two apple rootstocks 1
Orlikowska, T.: Influence of arginine on *in vitro* rooting of dwarf apple rootstock 9
Cheetham, R.D., Mikloiche, C., Glubiak M. & Weathers P.: Micropropagation of a recalcitrant male asparagus clone (MD 22-8) 15
Bates, S., Preece, J.E., Navarrete, N.E., Van Sambeek, J.W. & Gaffney, G.R.: Thidiazuron stimulates shoot organogenesis and somatic embryogenesis in white ash (*Fraxinus americana* L.) 21
De Vries-Paterson, R.M., Evans, T.A. & Stephens, C.T.: The effect of asparagus virus infection on asparagus tissue culture 31
Watson, B.S., Fletcher, J.S. & Russell, S.D.: Quantification of organelle changes in plant suspension cultures during growth 37
Kumar, A.: Somatic embryogenesis and high frequency plantlet regeneration in callus cultures of *Thevetia peruviana* 47
Marinković, N. & Radojević, L.: The influence of bud length, age of the tree and culture media on androgenesis induction in *Aesculus carnea* Hayne anther culture 51
Miller, J.G. & Fry, S.C.: Production and harvesting of ionically wall-bound extensin from living cell suspension cultures 61
Hammatt, N. & Ridout, M.S.: Micropropagation of common ash (*Fraxinus excelsior*) 67
Hol, G.M.G.M. & Van der Linde, P.C.G.: Reduction of contamination in bulb-explant cultures of *Narcissus* by a hot-water treatment of parent bulbs 75
Sawyer, H. & Hsiao, K-C.: Effects of autoclave-induced carbohydrate hydrolysis on the growth of *Beta vulgaris* cells in suspension 81
Erratum 87

Volume 31 No. 2

Budimir, S. & Vujičić, R.: Benzyladenine induction of buds and somatic embryogenesis in *Picea omorika* (Pančić) Purk 89
Taylor, T.E. & Veilleux, R.E.: Inheritance of competencies for leaf disc regeneration, anther culture, and protoplast culture in *Solanum phureja* and correlations among them 95
Bertrand-Desbrunais, A., Noirot, M. & Charrier, A.: Slow growth *in vitro* conservation of coffee (*Coffea* spp.). 2. Influences of reduced concentrations of sucrose and low temperature 105
Vinterhalter, D., Grubišić, D., Bojović-Cvetić, D.† & Budimir, S.: Lenticel hypertrophy in shoot cultures of *Ceratonia siliqua* L. 111
Levi, A. & Sink, K.C.: Asparagus somatic embryos: Production in suspension culture and conversion to plantlets on solidified medium as influenced by carbohydrate regime 115
De Bruyn, M.H. & Ferreira, D.I.: *In vitro* corm production of *Gladiolus dalenii* and *G. tristis* 123
Pawlicki, N., Sangwan, R.S. & Sangwan-Norreel, B.S.: Factors influencing the *Agrobacterium tumefaciens*-mediated transformation of carrot (*Daucus carota* L.) 129
Chen, J.L. & Beversdorf, W.D.: Cryopreservation of isolated microspores of spring rapeseed (*Brassica napus* L.) for *in vitro* embryo production 141
Schoenmakers, H.C.H., Nobel, E.M. & Koornneef, M.: Use of leaky nitrate reductase-deficient mutants of tomato (*Lycopersicon esculentum* Mill.) for selection of somatic hybrid cell lines with wild type potato (*Solanum tuberosum* L.) 151
Infante, R.: *In vitro* axillary shoot proliferation and somatic embryogenesis of yellow pitaya *Mediocactus coccineus* (Salm-Dyck) 155

Hulme, J.S., Higgins, E.S. & Shields, R.: An efficient genotype-independent method for regeneration of potato plants from leaf tissue 161
Lührs, R. & Nielsen, K.: Microspore cultures as donor tissue for the initiation of embryogenic cell suspensions in barley 169

Volume 31 No. 3

De Bruyn, M.H., Ferreira, D.I., Slabbert, M.M. & Pretorius, J.: *In vitro* propagation of *Amaryllis belladonna* 179
Sarmento, G.G., Alpert, K., Tang, F.A. & Punja, Z.K.: Factors influencing *Agrobacterium tumefaciens* mediated transformation and expression of kanamycin resistance in pickling cucumber 185
Owens, L.D. & Eberts, D.R.: Sugarbeet leaf disc culture: an improved procedure for inducing morphogenesis 195
Upadhyaya, G., Shivanna, M.B., Prakash, H.S. & Shetty, H.S.: A novel approach to the establishment of dual cultures of pearl millet and *Sclerospora graminicola* 203
Moura, I. & Carneiro, M.F.N.: *In vitro* culture of immature embryos of *Howea forsteriana* Becc. 207
Han, K. & Stephens, L.C.: Carbohydrate and nitrogen sources affect respectively *in vitro* germination of immature ovules and early seedling growth of *Impatiens platypetala* Lindl. 211
Doleželová, M., Doležel, J. & Neštický, M.: Relationship of embryogenic competence in maize (*Zea mays* L.) leaves to mitotic activity, cell cycle and nuclear DNA content 215
Van Ark, H.F., Hall, R.D., Creemers-Molenaar, J. & Krens, F.A.: High yields of cytoplasts from protoplasts of *Lolium perenne* and *Beta vulgaris* using gradient centrifugation 223
Tefera, H. & Chapman, G.P.: *In vitro* normal and variant development of t'ef (*Eragrostis tef*) spikelets 233
Galzy, R. & Compan, D.: Remarks on mixotrophic and autotrophic carbon nutrition of *Vitis* plantlets cultured *in vitro* 239
Bejoy, M. & Hariharan, M.: *In vitro* plantlet differentiation in *Annona muricata* 245
Jordan, M. & Oyanedel, E.: Regeneration of *Pouteria lucuma* (Sapotaceae) plants *in vitro* 249
Das, T.: Micropropagation of *Agave sisalana* 253
Kumar, A.: Micropropagation of a mature leguminous tree – *Bauhinia purpurea* 257
